

School Section Lake Association

July 9, 2008

Dear: Association Members

As your new president, I would like to start by saying thank you to Mary Jane Holmes for her dedicated service and leadership during the past two years. She started a lot of programs that will continue to add benefits to our association members and School Section Lake.

As your new president, I want to provide the leadership that will move the Association forward in improving School Section Lake and add value for the property owners. My goal is to have the most effective lake association in the region. We can do this by the Board focusing on the needs of the members and the Committee Chairs making constant improvement in their area of responsibility.

The overall goal of the Association is to leave our lake better than we found it. We will do this by an aggressive fish planting program, Lake Beautification projects, community, political and local business relationships. All of these objectives will be covered on the association website, www.schoolsectionlake.com

The Board needs your input so we can fully understand your needs. We have a lot of challenges that need immediate attention, like fighting off the threat of Zebra Muscles and invasive plants.

Thanks again for the opportunity to serve as your president; I hope to meet all of you in the near future.

Sincerely,

Jerry King
